INTRODUCTION:

- **PANELS** is a rising Egyptian company in the field of solar energy applications, specialized in providing smart technological engineering solutions for clean energy usage. We offer solar systems to residential and commercial buildings.

WHO WE ARE:

We are a group of highly qualified engineers with experience in renewable energy sector that can provide truly valuable integrated engineering services to our customer. We ensure that our services efforts support our client's vision, mission and values while optimizing the often-opposing forces of need and reality.

We deliver a complete package of selected services. A perfect result for partners and clients is what we are going for and we make sure to over deliver those expectations every time. We have a flexible facility planning concepts. Our approach is focusing on delivering targeted results to our clients. Our body of work and experience allows us to support comprehensive technology plans that reflect the latest advance in renewable energy while addressing the unique requirements and characteristics of our client's projects.

VISION, MISSION & VALUES:

- To become one of the Middle East leading companies in solar energy utilization, maintaining the highest quality of service and the best customer satisfaction experiences.

Our Vision

- Design, Build, Integrate, Verify and Validate the best system that covers the clients' needs, use business to inspire and implement innovative solutions to all technological issues.

Our Mission

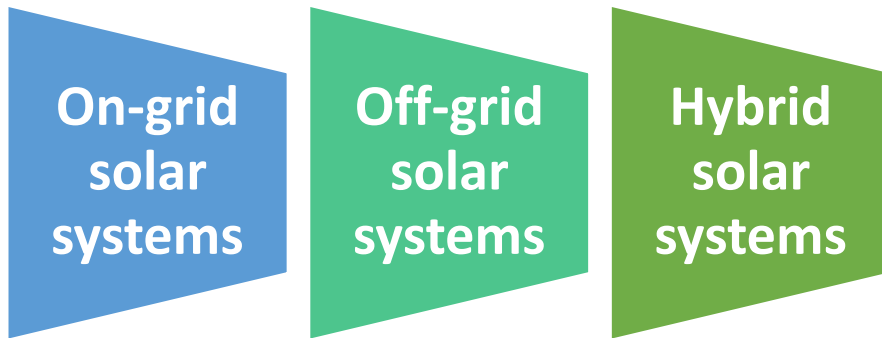

- Ethics, Trust, and integrity
- Creativity
- Safety and Clear communication
- Enthusiasm delivering work outcomes above and beyond the expected

Our Values

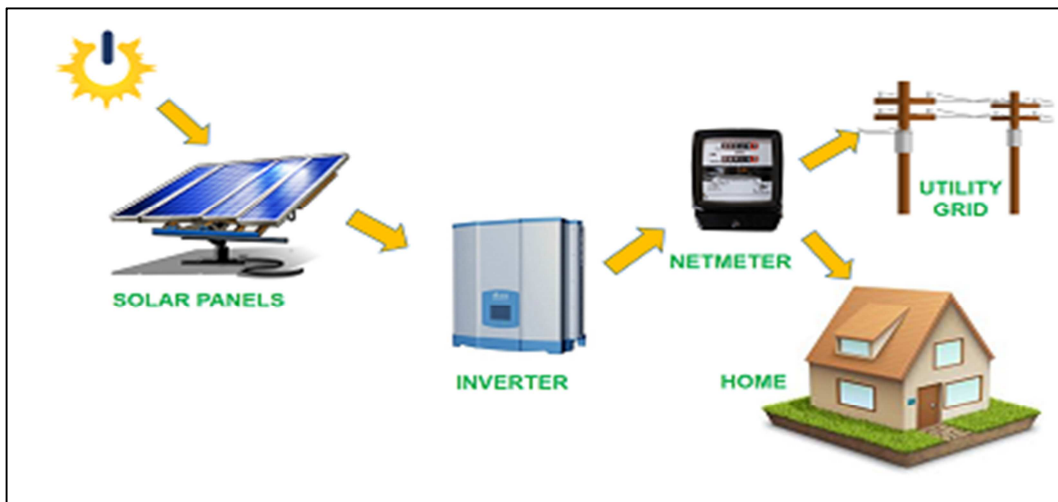

OUR SOLAR ENERGY SOLUTIONS:

➤ PV solar systems:

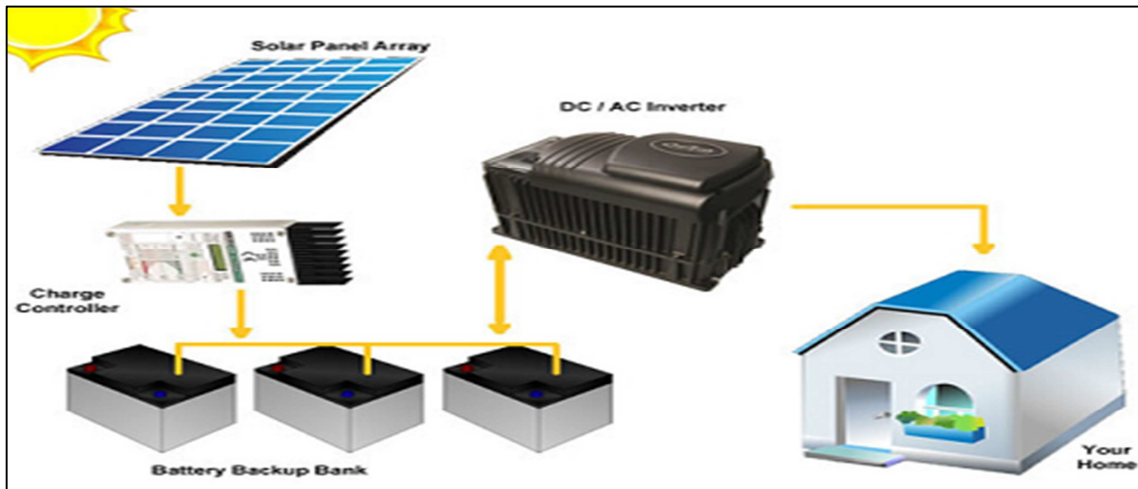

• On-grid solar systems:

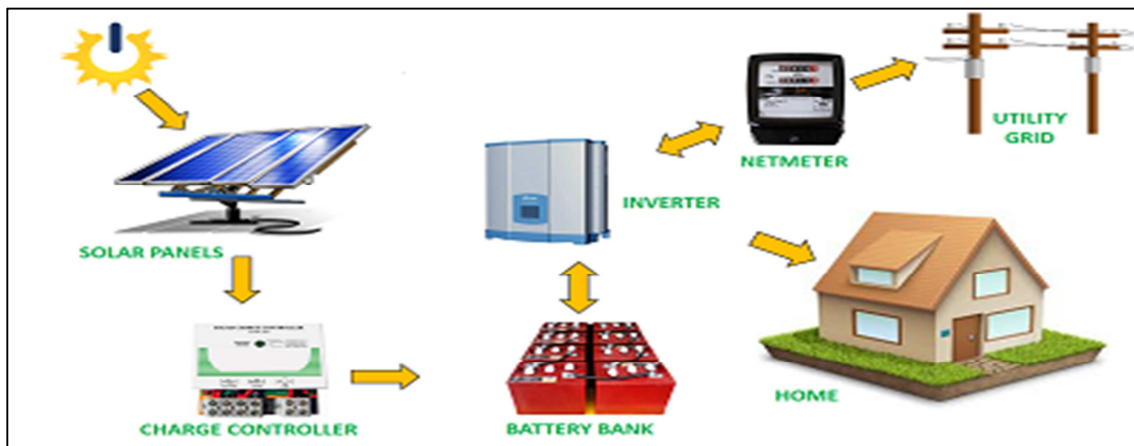

Allowing you to feed unused solar energy directly into the power grid, where you will receive financial incentive from the electricity company. It will help in cut down the bill values.

- **Off-grid solar systems:**

Allowing providing electricity for remote and isolated areas.

- **Hybrid solar systems:**

Generate power in the same way as a common on-grid solar system but use batteries to store energy for later use. This ability to store energy enables most hybrid systems to also operate as a backup power supply during a blackout, similar to a UPS system.

➤ **PV cladding modules:**

PV modules rely on the perfect combination of best components. The modules are manufactured to the highest industry standards and are fully certified.

BENEFITS OF SOLAR ENERGY

Eliminate or Reduce energy bills

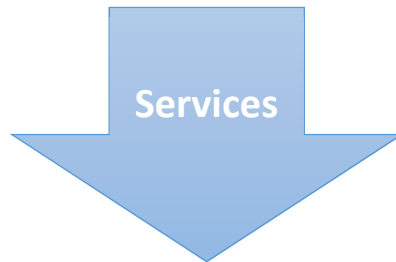

Protection against rising utility costs

Energy Independence

Cleaner future

OUR SERVICES:

Our solar services can be provided for both residential and commercials, offer flexibility and modularity to meet customers diversified needs. These services include:

Consultation

We'll take a look at your energy needs and tell you how much you can save by going solar. We'll also answer any of your questions, Simple and free.

Design

We'll visit your site to examine and take measurements. Then, our engineers will design a custom system to meet your energy needs and designed to shrink your energy bills.

Installation

On installation day, you can expect us to have your solar panels up and ready in about 4-8 hours. Once we're finished, we'll show you how to turn the system on and off.

Activation

Once the utility gives approval, you can start generating your own clean, renewable energy.

OUR COMMITMENT:

Cost Effective

We will always recommend the most economical route for your business.

Reliable

Our engineers will turn up when booked, on time and smart.

Quality Assurance

We always follow the requirements of quality standards in every step to ensure everything is completed accurately and on time.

PANELS has a partnership with **EPS** (Egypt Power System), a leading Egyptian company in the field of solar energy systems and a partnership with **Deutschland Power Land Gmbh**, a leading German company in the field of solar energy systems, these partnerships in developing business possibilities in relation to supply, install and operate solar energy projects.
